

Suspected COVID 19 Protocol

Oban High School

If there is reason to believe a pupil, or staff member, is showing symptoms of COVID 19 we will do the following...

1. Ensure the pupil/staff member is taken, by a First Aider*, to the Isolation Room (Medical Room)
2. Alert the parent or carers/ next of kin and make them aware of the symptoms showing. Ask them to collect their child/ next of kin at the quickest convenience
3. Check their temperature using the new thermometer provided
4. Ensure the child/staff member waits in the Isolation room until their parent or carer/ next of kin arrives at school to take them home (once the child/staff member leaves alert the day cleaner to the room which will need fully cleaned)
5. If the child/ staff member is showing symptoms they should self-isolate for the recommended amount of days and not return to school. A COVID 19 test should be arranged within the first 3 days of symptoms showing. [NHS Inform: COVID 19 Testing](#)
6. Test and Protect measures come in to place for the other pupils and staff members if the test comes back as positive

*All First Aid will be given by staff wearing full PPE
