

New Oban High School

Newsletter Issue 11 - March 2019

Introduction

Welcome to the new Oban High School newsletter. This is our 11th and final edition, which will give you a run down of the final Phase of the Project and what comes next

Argyll and Bute Council, with project partners hubNorth Scotland and Morrison Construction, the principal contractor remain committed to working together to bring this fantastic project to a close in the coming days.

We have appreciated your co-operation and patience throughout and we are continuing to complete the project with minimum disruption.

If you have any questions or would like more information about the project please contact Site Manager, Calum Cassidy at: 07443876866 or email: calum.cassidy@morrisonconstruction.co.uk or visit the project website at www.ohsproject.co.uk

Landscaped seating areas (to be seeded in the spring)

Right:
New Cycle Stands

Left:
Additional landscaped seating

Photos above, left and below: View of the Avenue to the main entrance.

Refurbished original school date stone.

New car park and bus route

Project Completion

The final stage of the Project has been the construction of the large parking area, bus drop-off and turning area as well as the surrounding soft and hard landscaping and new cycle shelters.

These works are nearing completion and it is clear to see the huge benefit these will give to the school and community using the great facilities that Oban High School now has to offer.

The project has an impressive avenue which will lead people from the new pedestrian access on Miller Road and car park and drop-off area down to the main entrance with seating on either side as well as the cycle shelter located at the end. The current landscaping has been replaced and upgraded to be more user friendly and break up the car parking area. Existing stone walls have been repaired and replaced to keep the area in touch with its original surroundings.

Morrison Construction would like to thank the community and most of all the school for their ongoing patience over the project duration and for their input and the good relationships which have been formed as a result of working with each other over these last few years.
